START COLLECTING

Using a different collection address:

Collection Address

Collection address

Existing pickup address

Existing pickup address

Existing address of a different customer

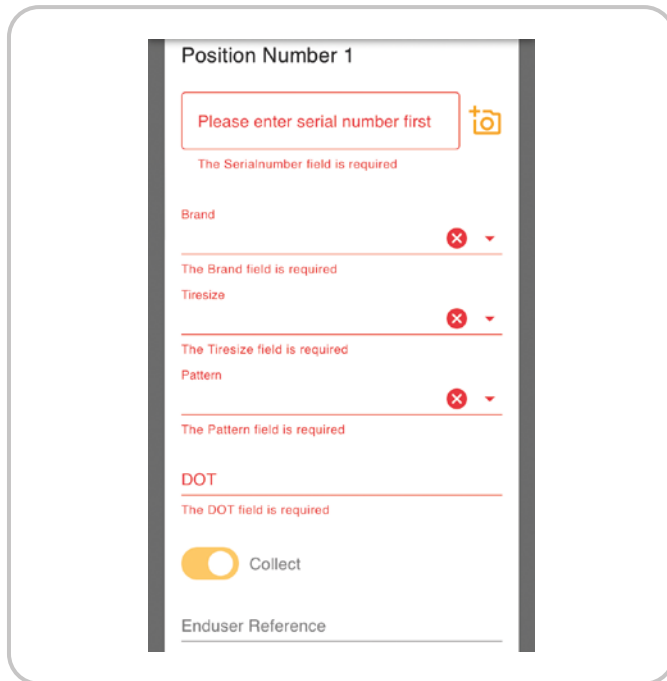

New address

Address of the current customer

If there is a different collection address, this can be selected or entered manually.

Serial number interface:

You can start recording the tire data here. If you photograph 📷 the serial number, all the relevant information about the tire will be transferred automatically.

Position Number 1

Please enter serial number first 📷
The Serialnumber field is required

Brand
The Brand field is required

Collect

Enduser Reference

The app opens the scan field (use the torch 🔦 if required). After centering the serial number on the red orientation line, you can begin recording.

Once the serial number has been identified by the system, all the fields will be filled in. If any information is missing, it can be entered manually in the empty fields.

Barcode 📊

If an error occurs and you want to check the serial number, you have the option of re-entering a different serial number 🔄 (we recommend deleting all fields beforehand).

Assigning the barcode:

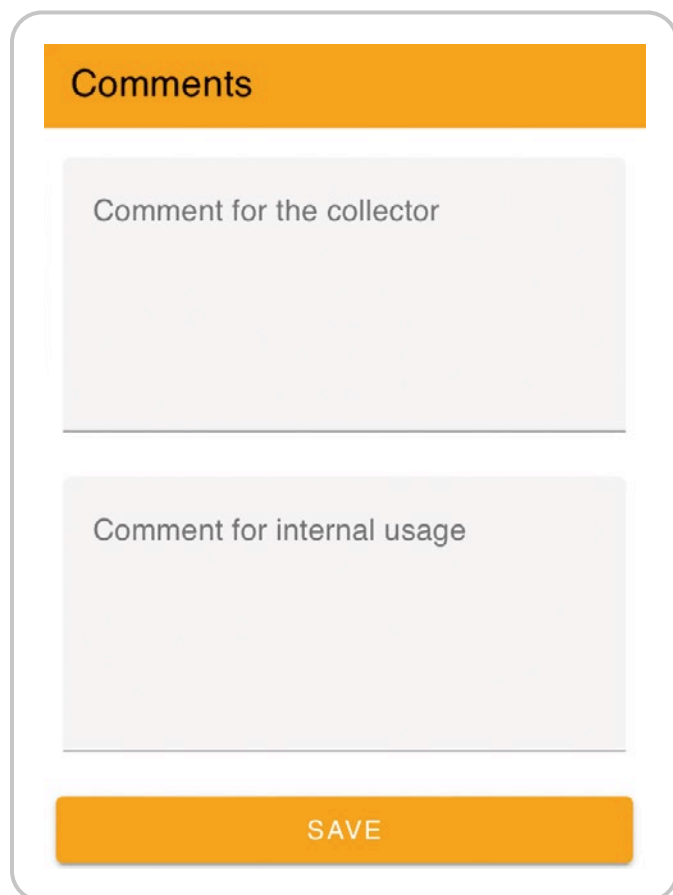

Assign the barcode to the tyre and scan it using the button .

The barcode number is assigned automatically. The tires can be assigned to an end customer by entering a customer-specific reference number (numeric only). To finalize the collection order, click Finish Collection. To add another item, click *Save+*.

A screenshot of a mobile application interface for assigning a barcode. At the top, there is a 'Barcode' label and a text input field containing the number '017900042504'. To the right of the input field is a small grey circle with a white 'x' and a yellow barcode icon. Below the input field is a white comment box with a small black speech bubble icon. At the bottom, there are two orange buttons: 'FINISH COLLECTION' and 'SAVE+'.

Comments for the collector  (visible on the pickup order) and internal comments (not visible on the collection order) can be entered in the Comments field.

A screenshot of the 'Comments' section of the application. It features an orange header with the word 'Comments' in white. Below the header are two large, light grey text input areas. The first area is labeled 'Comment for the collector' and the second is labeled 'Comment for internal usage'. At the bottom of the section is a wide orange button labeled 'SAVE'.

Synchronising pickup orders:

In the last step, you have the option of synchronising  your pickup order and transferring it to the database. If this step is forgotten, an automatic update will be carried out overnight.

You can create another pickup  order using the Add option.
